This month Dr Andrew Weber tells us which products are a favourite with his clients

“Our Dr Weber Skincare C12 Serum is a potent vitamin C antioxidant booster. This clever serum helps to increase the skin’s own protection and works to assist in improving skin tone. The Dr Weber Skincare C12 Serum is available in a 12% or 20% strength. It is recommended that you apply it in the morning and at night. I would recommend that you avoid the use of vitamin A during the mask course, as it increases cell turnover, which can cause dryness and flaking. If patients are happy for a more aggressive treatment with greater resurfacing and are prepared for associated retinoid response from the vitamin A, they can continue use, otherwise once the course is finished, ideally patients would build vitamin A (retinol) back into their regime. SPF must be applied daily. Immediately after a peel I recommend patients use the Hyalual Profi DeLux and then apply the Hyalual WOW Mask. The Hyalual Profi DeLux can be used morning and night throughout the a-peel course duration. WOW Masks can be used as frequently as the patient wishes. Most commonly if the skin is particularly dry to remedy this or as a ‘pre-date’ boost for the skin, to get it looking it’s best. The Hyalual Profi DeLux is a post-procedure spray that combines the unique formulation of hyaluronic acid and succinic acid. The hyaluronic acid creates a hydrating seal over the skin to protect it post procedure and the succinic acid speeds up the recovery times and energises the skin. It is very effective in soothing, protecting and hydrating the skin. The WOW Mask is an innovative gel sheet mask that contains 4% hyaluronic acid as well as peptides, stem cells and plant extracts to help hydrate, sooth and reduce fine lines and wrinkles. It is a great post procedure treatment to rehydrate, cool and calm the skin down. It is also popular with patients prior to an important event, such as a red carpet or VIP event, as it hydrates and plumps the skin, allowing flawless make-up application with a radiant glow.”

Dr Andrew Weber, medical director, Bodyvie Medi-Clinic, Richmond

Dr Andrew Weber is the medical director and lead doctor at Bodyvie Medi-Clinic, Richmond. His client list includes beauty editors, actors, TV presenters and high-profile business people who delight in their secret go-to clinic in the beautiful London Borough of Richmond which offers all of the ‘Harley Street’ excellence while maintaining a welcome air of privacy. Dr Weber was a founding member of the British Association of Cosmetic Doctors (now the British Association of Aesthetic Medicine) and is a Fellow of the Royal Society of Medicine (FRSM). **AM**
